

CAPACITIES ARE MMF UNLESS OTHERWISE NOTED

C17, C19, C20, AND C26
The lead identification for the four-section ceramic capacitor RCW-3048 (K71J670) can be observed from the illustration of Figure 2.

Capacitor RCW-3013

General Electric models as listed in the upper left hand corner, but without the suffix "F", use an identical circuit but employ 12SA7 instead of 12BE6, and 12SQ7 for 12AV6, and differ in physical assembly.
